Table 5. Sources for Seeking Information on Pregnancy and STIs

|  | Total    | Pregnancy | STIs     |
|--|----------|-----------|----------|
| <u>Source</u>                            | <u>n</u> | <u>n</u>  | <u>n</u> |
| School-based sources                     | 38       | 25        | 13       |
| <i>School</i>                            | 16       | 10        | 6        |
| <i>Teachers</i>                          | 12       | 10        | 2        |
| <i>Human Growth &amp; Development</i>    | 8        | 4         | 4        |
| <i>School Counselors</i>                 | 2        | 1         | 1        |
| Internet (almost all google)             | 25       | 15        | 10       |
| Friends                                  | 22       | 17        | 5        |
| Doctor/Nurse/Clinic/Pharmacy/Health Fair | 17       | 11        | 6        |
| Parents                                  | 13       | 10        | 3        |
| TV/News                                  | 8        | 7         | 1        |
| CBO                                      | 6        | 4         | 2        |
| Brochures/Books/Flyers                   | 6        | 3         | 3        |
| Adults other than parents/teachers       | 5        | 4         | 1        |
| Church                                   | 1        | 1         | 0        |

# Opinions of U.S. Adults About Sexual Health Programs

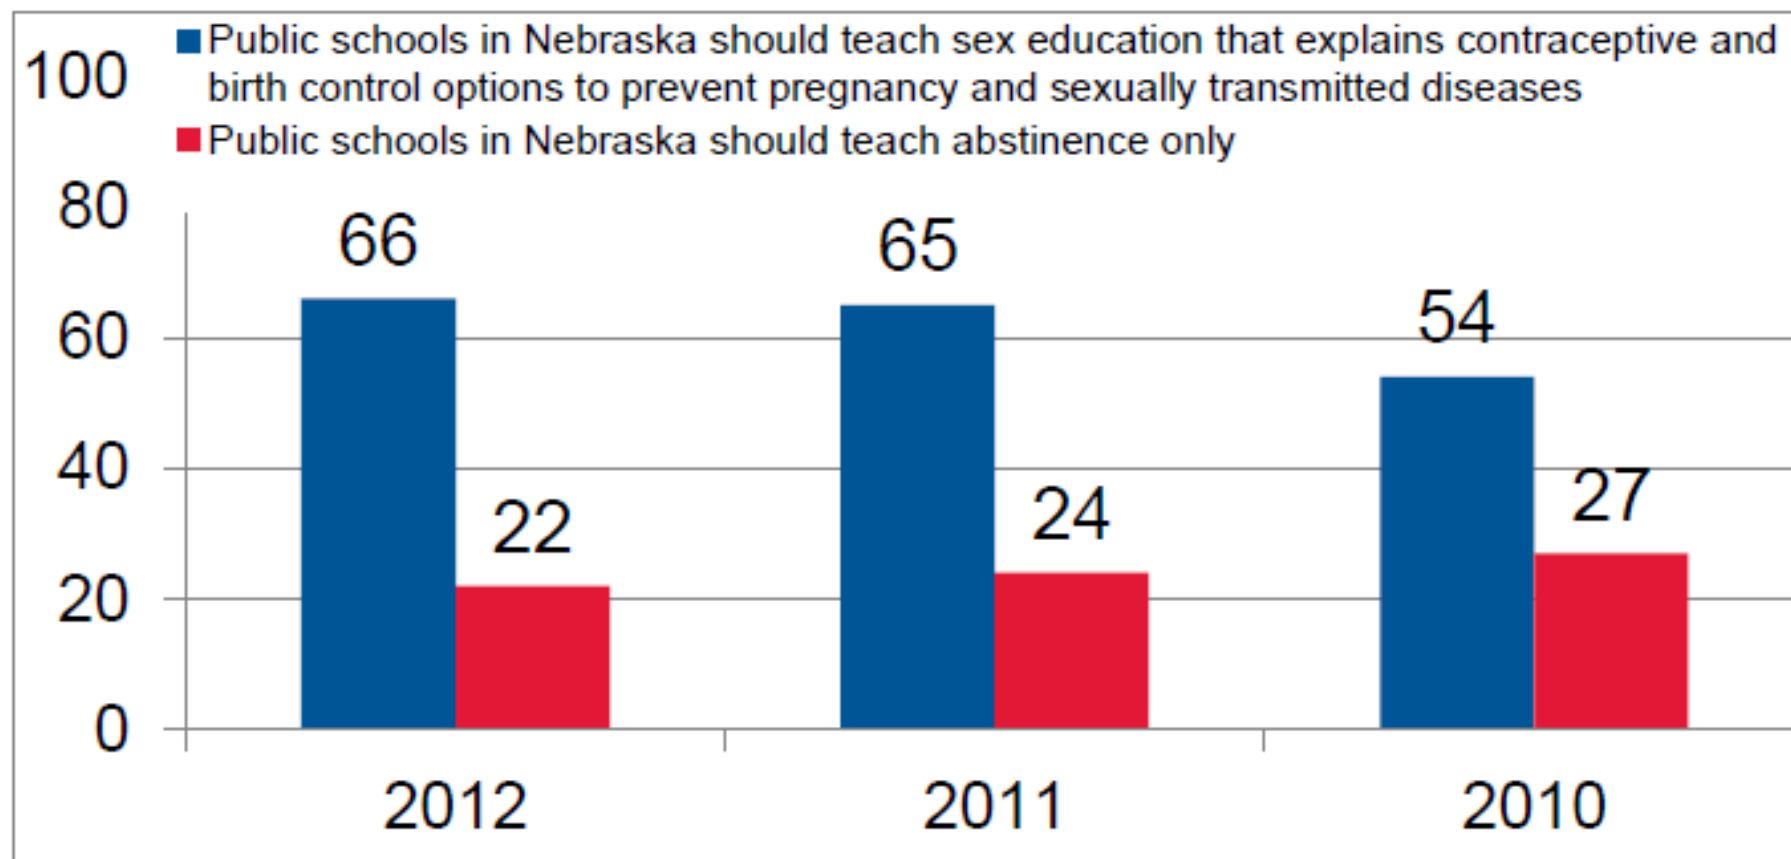

- **95%** of **parents** of JH students and **93%** of **parents** of HS students believe that birth control and other methods of preventing pregnancy are appropriate topics for sexuality education programs in schools.
- **75%** of **parents** believed that the topic of sexual orientation should be included in sexuality education programs and “discussed in a way that provides a fair and balanced presentation of the facts and different views in society.”
